Experience

Softimpact

Jdeideh

MOBILE DEVELOPER

Jan 2023 – Nov 2024

- Led the complete rewrite of the Al Jadeed native apps to Flutter, featuring news updates, live streaming and episodes video playback, Google Cast & Apple AirPlay integration, Picture-in-Picture, Banner / IMA Ads, Push Notifications, QR Code login, Caching, Quick Actions and more. Also developed Al Jadeed for tvOS using React Native, and contributed to its implementation on the Tizen platform utilizing web technologies.
- Successfully migrated the Lebanon 24 app from native technologies to a unified Flutter codebase, implementing key features such as banner ads, push notifications, home screen widgets using native code, and efficient caching to enhance performance and user engagement.
- Developed a digital assistance mobile application called Ian Assist, for the insurance company Mideast Assistance featuring support ticket system, live chat, claim submission, and document upload functionalities.
- Rewrote and modernized the Ticketing Box Office app in Flutter, enhancing its appeal and functionality with features such as event browsing, direct booking, ticket scanning at event entrances, and integrated charts.
- Developed the Fujairah TV app from scratch using Flutter, featuring a beautifully designed weather section, episode reminders, and incorporating video player capabilities similar to those in the Al Jadeed app.
- Led the complete rewrite of Aliman TV and Ekher el Akhbar apps from scratch, successfully migrating both to Flutter for enhanced performance and user experience.

Fodigi

Remote
