Pierre Sabbagh

Mobile & Full-Stack Developer

Biaqout, LB • +96176630992
sabbaghpierre@protonmail.com • sabbaghpierre.is-a.dev • sabbaghpierre

5+ years in production software across mobile, frontend and backend: migrated 5 live apps to Flutter, including 2 national news apps with 1M+ existing installs, and shipped Angular front-ends and Go APIs. Sole mobile developer on an equestrian platform, delivering video, push and analytics driven by a backend-trained model.

WORK EXPERIENCE

Adrea – Mobile Developer (Remote Contract) *Jan 2025 – Present*

- Sole mobile developer on Adrea, an equestrian platform covering horse health, medical records and daily operations.
- Shipped 4 feature areas: live video feed, push notifications, medical file management, and in-app analytics surfacing predictions from a backend-trained model.
- Delivered horse tracking with over 90% location accuracy measured in live facility use.

DomainAgents – Full Stack Developer (Remote, Canada) *Nov 2024 – Apr 2026*

- Led front-end development of domainagents.com and 4 internal Angular tools, maintaining and shipping features end to end.
- Engineered a Dynamic Landing Page Builder from scratch, letting customers build their own marketing pages for domains on sale without developer involvement.
- Added backend endpoints in Go and Gin with related database work, and rebuilt GitHub Actions deploy pipelines.

Softimpact – Mobile Developer (Jdeideh) *Jan 2023 – Nov 2024*

- Led Flutter development across 5 apps: Al Jadeed, Lebanon 24 and Ticketing Box Office, the first two with existing install bases of 1M+ each, plus tvOS in React Native and Tizen.
- Maintained 24/7 uptime for thousands of users through Lebanon's crisis, owning releases and crash monitoring, delivering live streaming, AirPlay, Google Cast, Picture-in-Picture, ads and push notifications across Fujairah TV, Aliman TV and Ekher el Akhbar.
- Built Ian Assist for Mideast Assistance from scratch, covering ticketing, live chat and claims.

TheWebAddicts – Mobile Developer (Mirna Chalouhi) *Jan 2022 – Jan 2023*

- Architected a cinema booking ecosystem for Iraqi Cinema across 3 platforms: POS desktop, kiosk and mobile.
- Built and shipped Target Food, an e-commerce grocery app in Flutter.
- Created Artist & More, a Flutter ticket scanner app for event admissions.
- Developed USA Cab Ads, tracking NYC cab campaigns via GPS with in-app analytics.

Fodigi – Mobile & Backend Developer (Dekwaneh) *Jan 2021 – Dec 2021*

- Built Urban Beirut (100k+ downloads) in Flutter on the client's WooCommerce REST API, adding a Firestore backend for in-app feature data, push notifications, Crashlytics and the Wisp AI assistant with live product search.
- Delivered Beirutic (20k+ downloads) on the same Flutter and WooCommerce stack, with custom Firebase endpoints extending core store data.

SKILLS

Programming Languages:	Dart, TypeScript, JavaScript, Go, Java
Frameworks & Libraries:	Flutter, React Native, React, Angular, Node.js, Gin, Bloc, MCP, LLM Integration
Platforms & Infrastructure:	Android, iOS, tvOS, Tizen, GCP, Firebase/Firestore, MariaDB, SQLite, Docker, Kubernetes, GitHub Actions, CI/CD, Git, WooCommerce REST API, App Store & Google Play

LANGUAGES

Fluency:	Arabic (Native), English (Professional), French (Professional)

EDUCATION

Arab Open University – B.S. in Computer Science (Antelias, Lebanon) *2017 – 2020*
