EXPERIENCE

Adrea – Mobile Developer (Remote Contract)

Jan 2025 – Present

- Lead mobile development of the Adrea app, a comprehensive equestrian facility management platform that enables complete oversight of horse health, medical records, and daily operations, where engineered all of the features, from live video feed, push notifications, horse medical files management to data analytics driven by AI oversight.

DomainAgents – Full Stack Developer (Remote)

Nov 2024 – Apr 2026

- Lead front-end development, maintaining and enhancing features of domainagents.com and various sub-projects.
- Engineered a custom Dynamic Landing Page Builder from scratch, increasing internal marketing agility.
- Contributed across the full stack on the Backend/DevOps side.

Softimpact – Mobile Developer (Jdeideh)

Jan 2023 – Nov 2024

- Led the complete migration and modernization of several apps to Flutter, including top news apps such as Al Jadeed and Lebanon 24, maintaining 24/7 uptime for millions of users during periods of national instability. Additional apps such as Fujairah TV, Aliman TV, and Ekher el Akhbar were also developed, integrating advanced features such as news updates, live streaming, episodes video playback, Google Cast & Apple AirPlay support, Picture-in-Picture, Banner/IMA Ads, Push Notifications, QR Code login, Caching, Quick Actions, Weather Section, Episode Reminders and performance optimizations.
- Led the development of Al Jadeed for tvOS using React Native and contributed to its implementation on the Tizen platform using web technologies.
- Developed Ian Assist for Mideast Assistance, featuring support tickets, live chat, claim submissions, and document uploads.
- Rebuilt the Ticketing Box Office app from scratch with event browsing, direct booking, ticket scanning, and integrated charts.

Groupe Vital – Full Stack Web Developer (Remote Contract)

Mar 2023 – Jun 2023

- Contributed to full-stack development of an internal web platform for employee management using ReactJS and NodeJS backend services.

TheWebAddicts – Mobile Developer (Mirna Chalouhi)

Jan 2022 – Jan 2023

- Architected and developed a unified cinema booking ecosystem (POS Desktop, Kiosk, Mobile) for Iraqi Cinema.
- Engineered and launched Target Food, a comprehensive e-commerce grocery app, using Flutter for a seamless shopping experience.
- Created Artist and More, a ticket scanner app for event admissions, using Flutter.
- Developed USA Cab Ads, an app for monitoring and analyzing NYC cab advertisements, with GPS tracking and advanced analytics.

Fodigi – Mobile & Backend Developer (Dekwaneh)

Jan 2021 – Dec 2021

- Engineered Urban Beirut and Beirutic e-commerce apps; built custom backend services and data structures using Firebase to extend core capabilities beyond standard WooCommerce APIs.
- Contributed to a delivery based app with Google Maps tracking.
