Pierre Sabbagh

Mobile & Full-Stack Developer

Biaqout, Lebanon • +96176630992
sabbaghpierre@proton.me • sabbaghpierre.is-a.dev • LinkedIn: sabbaghpierre

Mobile and full-stack developer with 5+ years delivering production applications across mobile, web and backend. Built self-service web tools and APIs, and led six app migrations, including two news apps with 1M+ existing installs each.

WORK EXPERIENCE

Adrea – Mobile Developer (Remote Contract) *Jan 2025 – Present*

- Sole mobile developer for an equestrian platform, delivering live video, push notifications, medical records and analytics displaying predictions from a backend-trained model.
- Delivered horse tracking identifying the correct stable or zone with over 90% accuracy in live facility use.

DomainAgents – Full Stack Developer (Remote, Canada) *Nov 2024 – Apr 2026*

- Led front-end development of domainagents.com and four internal Angular tools.
- Built CRUD APIs in Go/Gin, created and modified database tables, and optimized SQL queries for faster data retrieval.
- Built a self-service landing-page builder, enabling customers to create marketing pages for domains without developer involvement.
- Optimized GitHub Actions pipelines to reduce build times.

Softimpact – Mobile Developer (Jdeideh) *Jan 2023 – Nov 2024*

- Led six Flutter migrations, including Al Jadeed and Lebanon 24 (1M+ existing installs each), and built Fujairah TV from scratch.
- Delivered live streaming, AirPlay, Google Cast, Picture-in-Picture, ads and push notifications; owned mobile releases and crash monitoring supporting 24/7 news access for thousands of users.
- Led Al Jadeed's tvOS development in React Native and contributed to its Tizen implementation.

TheWebAddicts – Mobile Developer (Mirna Chalouhi) *Jan 2022 – Jan 2023*

- Architected Iraqi Cinema's booking ecosystem across POS desktop, kiosk and mobile.
- Shipped Target Food, a Flutter grocery app; Artist & More, a Flutter ticket-scanning app; and USA Cab Ads, featuring GPS campaign tracking and analytics.

Fodigi – Mobile & Backend Developer (Dekwaneh) *Jan 2021 – Dec 2021*

- Extended WooCommerce-backed apps with Firestore data storage and custom Firebase endpoints, alongside push notifications and Crashlytics.
- Built Urban Beirut (100k+ downloads) and Beirutic (20k+ downloads) in Flutter.
- Later project update (2026): added Wisp, an AI assistant for Urban Beirut with live product search.
